

CODY CHOULES

Prescott, AZ 86303 • codychoules@gmail.com • +1 (480) 694-6775

PROFESSIONAL SUMMARY

Technical professional based in Prescott with a computer science degree, practical SQL and SQL Server experience, Python and Linux familiarity, and service practices. Six years at Landmark included independent database support, data integration, and ownership of geospatial and project datasets used for planning, version control, and project execution. Comfortable translating messy real world sources into clean data that helps make for reliable data control, documenting logic, and coordinating across teams with various skills outside my expertise. Experience with enterprise systems and services along with a track record of quickly adapting to new demands and company goals.

PROFESSIONAL EXPERIENCE

LANDMARK BUILDING CONSULTANTS

MESA, AZ 85215

VDC Coordinator & Technical Lead

2017-2023

- Developed and managed 3D visualizations and geospatial datasets for commercial and residential projects along multi year timespans.
- Led the adoption of new digital workflows, introducing advanced visualization and geospatial tools emergent at the time such as realtime rendering, 3D topology mapping, and BIM 3D drafting & version control.
- Gained experience in enterprise level software including Autodesk, Archicad, and SketchUp.
- Independently managed IT needs, hardware/software setup, and database interactions.
- Integrated new technology such as digital modeling tools, drone use, & cloud data management.

Superintendent, Assistant Superintendent, & General Tech

2013-2017

- Managed multiple construction projects, ensuring structural accuracy and project efficiency.
- Worked with CAD software to interpret blueprints and site plans.
- Led teams and coordinated with subcontractors to oversee various phases of construction.
- Developed skills in GIS applications related to construction planning and site analysis.

GO PLAY DURANGO

Durango, CO 81301

Electric Bike Rental Manager & IT

2022

- Managed daily operations, customer service, IT needs, and logistics for a rental business.
- Worked independently, reducing the employer's workload and increasing operational efficiency.
